PROFILE

I'm a Web Developer specializing in front end development. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including HTML5, JavaScript, CSS, React JS. Strong background in project management and customer relations .

PROJECTS

My Blog

- Description: Developed a personal blog using React. Took ownership of the entire project from design to implementation.
- Responsibilities:
- Debugged issues and found solutions independently by researching and learning from YouTube tutorials.
- Implemented custom functionalities and styled the blog using modern design practices.
- Integrated the ability to upload and display pictures, enhancing the user experience.
- Leveraged Appwrite as the backend database for data storage and management.
- Technologies Used: React, JavaScript, Appwrite, use-hook-form, TinyMCE, Tailwind CSS, HTML, CSS.
-

Amazon Clone

- Description: Created a clone of Amazon's website using vanilla JavaScript.
- Responsibilities:
- Took on the challenge of building a complex project and resolved issues through hours of debugging.
- Thought critically to solve problems and optimize performance in the project.
- Technologies Used: Vanilla JavaScript, HTML, CSS.
-
